

Manufacturing Indonesia 2022 held in Jakarta, Indonesia
(30th November – 3rd December 2022) by PT. Hitachi Asia Indonesia/HAS-ICE

Manufacturing Indonesia is Indonesia's largest international manufacturing exhibition providing a professional business platform for Indonesia's manufacturing industry. Taking this opportunity, PT. Hitachi Asia Indonesia participated in the event held in Jakarta, Indonesia from 30th November to 3rd December 2022 and showcased various products including air compressor (DSP-37A5N2-0.7MPa) connected to FitLive, ink jet printer (UX-D160W) completes with conveyor for industrial applications, Inverter Rope Hoist (1HM-T65-W4), Chain Hoist (1SH) and inverters (WJ200N, SH1, WJ-C1) and HX Controller.

Our experts provided comprehensive explanation on our newly launched 'FitLive', a cloud monitoring service that can achieve appropriate life cycle management by IoT of industrial equipment. The system allows the customer to understand their operating status in real time remotely via automatic mail transmission while operation data is automatically uploaded on the cloud.

This platform creates a chance for us to meet many customers and partners and allowed us to learn a lot about the manufacturing industry trends, new technologies and our own solution portfolio. We look forward to exploring new opportunities with our customers and partners.

The event concluded successfully with impressive attendance and personally, the interactions with customers, fellow colleagues and industry partners are the most fulfilling aspect.

A huge thank you to everyone who took time out to join us, and we look forward to meeting more partners next year, be it regular or new!
