Hitachi Asia ICT Solutions Business Group has been awarded the IDA Bulk Tender (T)1177 contract
2-year provision of servers, storage systems and accessories to government, statutory boards and participating universities in Singapore

Singapore, August 01, 2014 - Hitachi Asia ICT Solutions (hereinafter known as HAS), a leading Systems Integrator in Asia Pacific, has been awarded by the Infocomm Development Authority (IDA) to supply, deliver, lease, install and maintain servers and storage systems for the government, statutory boards and participating universities in Singapore.

For more than 100 years, Hitachi's technologies have contributed to the betterment of society - bringing greater convenience, comfort and sustainability. Hitachi studies the daily problems that people face, assesses the ability of existing technology to solve those problems and analyses the challenges ahead. Using the data collected, Hitachi creates new technologies (in market sectors such as **Information & Telecommunications Systems**, Power & Industrial Systems, Elevators & Escalators, Green Mobility & Next Generation/Rail Transportation, Intelligent Water, Renewal Energy etc.) that not only make life better, but also make the world a better place to live in. We call this Social Innovation business. Hitachi has been the foundation of change, the catalyst of tomorrow and the bridge to the future. Today, Hitachi continues to be the reliable partner and collaborates with the Singapore Government to achieve better living and greater heights for the nation.

As a leading ICT solutions provider, HAS has amassed an immense wealth of knowledge and practical experiences on technologies from our partners such as HDS, IBM, Overland, Brocade, Emerson, Raritan, F5, McAfee, SJ, SAP, Microsoft etc.- solutions which we are awarded in the IDA Bulk Tender, or which are widely used by the Singapore Government, and which HAS is absolutely well equipped to implement or integrate, so as to provide IDA with seamless, wholly-integrated solutions.

HAS is a certified True North partner for storage solutions from our sister company, Hitachi Data Systems Pte. Ltd. We have a solid track record of implementing numerous mission-critical, high-availability solutions (BC/DR) encompassing storage, server, network, security and data centre. These implementations also involve complex storage & server consolidations, virtualization,

24x7 systems management and 24x7 operations management. Our impeccable systems integration services ensure that your entire ICT solution stack from software applications, middleware to hardware will be seamlessly integrated to enable your business.

Besides storage solutions, HAS is able to capitalize on our excellent expertise and experience in business applications (e.g. ERP, CRM, etc.) and business analytics (analyzing big data generated from tremendous 4-V (Velocity, Volume, Variety and Variability) data expansion) to provide invaluable real-time information analyses which will enable Government agencies to make informed real-time decisions anytime, anywhere.

HAS' ICT professional services include rendering top-notch **consulting, design, implementation, systems integration, project management and post-implementation on-site/remote maintenance and support** to keep your business operations fully functional **24x7**. By rigorously practicing Hitachi's core values of "harmony, sincerity and pioneering spirit" and HAS values of "customer-first, innovation, quality deliverables and teamwork", we have effectively integrated our clients' processes, technologies and people - optimizing their ROI for ICT.

With HAS' stringent adherence to Hitachi's Japanese Project Management & ICT methodologies and Quality Assurance processes, we have successfully implemented multiple large, complex ICT projects - on time and within budget. Our expert capabilities in integrating the most advanced yet practical business and ICT solutions for organizations of diverse industries and sizes, have enabled many clients to improve on their business effectiveness and operational efficiency - resulting in increased productivity, cost savings, profit margins, and achieving a strategic advantage over their competitors.

Contact us today to enhance your ICT infrastructure **(servers, storage systems and accessories)** to support your business needs.
